

Stone Profiles have a good resistance to abrasion, water and alkali as well as excellent aesthetics and durability for natural marble and stone. They have superior adhesion to all prime substrates and are non-toxic, non-hazardous and environmentally friendly. Resin Bonded Plasters have superior weathering, alkali and abrasion resistance, controlled water vapor permeability and are non-toxic and environmentally friendly. Glass guard are a new generation with excellent resistance to dirt retention, water, weather and ultraviolet rays, they are extremely hard-wearing with good impact resistance. They are excellent for harsh industrial conditions.

Multicolour Coating Systems are tough impact, abrasion, water resistant and are suitable for wet conditions. They are excellent for high traffic conditions like corridors and are easy to maintain using conventional aqueous household detergents and environmentally friendly. High Build Acrylic Paints are high sheen finish enhanced by Teflon, with excellent elasticity elongation at break, superior washability, excellent abrasion, weather and dirt
